GET A SUPER NICE INDOOR CLIMATE IN THE SUMMER HOUSE WITHOUT AN UNPLEASANT SMELL

All our furniture, curtains, and textiles, including clothes and more, have a strange smell after our summer house has been empty for most of the winter.

We bring our little machine MAC500s with us to the summer house, plug it in and let it clean up - and very quickly, we have a super nice indoor climate without an unpleasant summer house smell.

It's so easy and cost-effective - and as an added bonus, my husband's pollen allergy is actually gone when we stay in the summer house with MAC500s running 24/7.
